SUBJECT INDEX FOR VOLUME II

Alfalfa—
  for breeding ewes, 209.
  for fattening steers, 359.
  for pigs, 374.
  production and prevention of bloat in cattle, 285.
Animal husbandry fundamentals, 376.
Ascorbic Acid—
  gonadotropic hormone relationships, 356.
  metabolism in the horse, 175.
  relation to breeding, 53.

Beef meal for pigs, 374.
Blood—
  meal for calves, 361.
  phosphorus level of ewes, 369.
  plasma of calves, 362.
Bluegrass, for fattening steers, 359.
Boar—see swine.

Calcium—
  requirements of foxes, 366.
  requirements of horses, 366.
  and phosphorus for horses, 103.
Calves—see cattle.
Carotene, blood content in calves, 362.
Cattle—
  bloat in, 285, 365.
  blood plasma of calves, 362.
  dried whey and blood meal for calves, 361.
  effects of feeding urea to steers, 166, 328.
  effects of pituitary gonadotropins upon cows, 356.
  gestation period in, 50.
  grazing experiments with lespedeza, 314.
  manure as carrier of B-complex vitamins, 373.
  metabolizable energy of feedingstuffs, 226.
  rental plan for bulls, 360.
  semen characters and production in bulls, 360.
  shipment of semen, 361.
Cattle, beef—
  bloat in steers, 221.
  corn cobs in fattening, 359.
  development in southeastern states, 377.
  feeding wheat to, 360.
  growth in Hereford and Shorthorn heifers, 359.
  limited vs. full feeding, 321.
  muscle-bone ratio, 42.
  roughage for fattening, 359.
Cattle, dairy—
  feeding standard equations for cows in milk, 304.
  freshening date changes of, 112.
  measuring the genetic change in a herd average, 358.
  pasture for, 369.
  peanut hay for, 362.
  silage from Atlas sorgo for, 295.
Cattle, dual-purpose—
  muscle-bone ratio, 42.
Cellulose, seasonal changes in grass, 59.
Colostrum, effect on calves, 362.
Corn—
  cobs for steer calves, 359.
  meal, nutritive value of, 361.
  yellow, for pigs, 374.
Correlation, in rate and efficiency of gains in animals, 367.
Cottonseed meal, for pregnant ewes, 27.
Cows—see cattle.
Crossbred foundation of inbred swine, 129.

Digestibility of brown silage for dairy cows, 295.

Environment, importance in growth of pigs, 3, 118.
Estrus in ewes, 251.
Ewes—see sheep.

Feeding—
  limited vs. full in tests for beef cattle, 321.
  standard equations for cows and goats in milk, 304.
Feedingstuffs—
  metabolizable energy of, 226.
  scheme of analysis of, 278.
Feeds—
  biological methods of measuring the protein values of, 263.
  evaluation of for fattening lambs, 336.
  evaluation of on basis of available nutrients, 63.
  war-time in Germany, 367.
Fiber—see wool.
Fleece—see wool.
Fluorine for sheep, 366.
Foxes, calcium requirements of, 366.
Genetic change in a herd average, 358.

SUBJECT INDEX FOR VOLUME II

Alfalfa—
  for breeding ewes, 209.
  for fattening steers, 359.
  for pigs, 374.
  production and prevention of bloat in cattle, 285.
Animal husbandry fundamentals, 376.
Ascorbic Acid—
  gonadotropic hormone relationships, 356.
  metabolism in the horse, 175.
  relation to breeding, 53.

Beef meal for pigs, 374.
Blood—
  meal for calves, 361.
  phosphorus level of ewes, 369.
  plasma of calves, 362.
Bluegrass, for fattening steers, 359.
Boar—see swine.

Calcium—
  requirements of foxes, 366.
  requirements of horses, 366.
  and phosphorus for horses, 103.
Calves—see cattle.
Carotene, blood content in calves, 362.
Cattle—
  bloat in, 285, 365.
  blood plasma of calves, 362.
  dried whey and blood meal for calves, 361.
  effects of feeding urea to steers, 166, 328.
  effects of pituitary gonadotropins upon cows, 356.
  gestation period in, 50.
  grazing experiments with lespedeza, 314.
  manure as carrier of B-complex vitamins, 373.
  metabolizable energy of feedingstuffs, 226.
  rental plan for bulls, 360.
  semen characters and production in bulls, 360.
  shipment of semen, 361.
Cattle, beef—
  bloat in steers, 221.
  corn cobs in fattening, 359.
  development in southeastern states, 377.
  feeding wheat to, 360.
  growth in Hereford and Shorthorn heifers, 359.
  limited vs. full feeding, 321.
  muscle-bone ratio, 42.
  roughage for fattening, 359.
Cattle, dairy—
  feeding standard equations for cows in milk, 304.
  freshening date changes of, 112.
  measuring the genetic change in a herd average, 358.
  pasture for, 369.
  peanut hay for, 362.
  silage from Atlas sorgo for, 295.
Cattle, dual-purpose—
  muscle-bone ratio, 42.
Cellulose, seasonal changes in grass, 59.
Colostrum, effect on calves, 362.
Corn—
  cobs for steer calves, 359.
  meal, nutritive value of, 361.
  yellow, for pigs, 374.
Correlation, in rate and efficiency of gains in animals, 367.
Cottonseed meal, for pregnant ewes, 27.
Cows—see cattle.
Crossbred foundation of inbred swine, 129.

Digestibility of brown silage for dairy cows, 295.

Environment, importance in growth of pigs, 3, 118.
Estrus in ewes, 251.
Ewes—see sheep.

Feeding—
  limited vs. full in tests for beef cattle, 321.
  standard equations for cows and goats in milk, 304.
Feedingstuffs—
  metabolizable energy of, 226.
  scheme of analysis of, 278.
Feeds—
  biological methods of measuring the protein values of, 263.
  evaluation of for fattening lambs, 336.
  evaluation of on basis of available nutrients, 63.
  war-time in Germany, 367.
Fiber—see wool.
Fleece—see wool.
Fluorine for sheep, 366.
Foxes, calcium requirements of, 366.
Genetic change in a herd average, 358.

Germany, war-time feeds, 367.
Gestation, period in cattle, 50.
Goats, in milk, feeding standard equations for, 304.
Gonadotropic—
  hormone relationships to ascorbic acid, 356.
  hormones for ewes, 372.
Gonadotropins, pituitary effects of, upon cows, 356.
Grasses, Montana, seasonal changes, 59.
Growth—
  in heifers, 359.
  in Karakul and mutton sheep, 371.
  pigs, importance of heredity and environment in, 3, 118.
  rate in swine, 375.

Heifers—see cattle.
Heredity, importance in growth of pigs, 3, 118.
Heritability—
  in swine, 375.
  of yearling fleece and body traits in ewes, 358.
Hogs—see swine.
Horses—
  ascorbic acid for, 53.
  calcium and phosphorus for, 103.
  calcium requirements of, 366.
  fertility in, 363.
  metabolism of ascorbic acid in, 366.
  Percherons, 103.

Inbred swine from crossbred foundation, 129.
Inbreeding, effects of, on performance in swine, 356.
Insemination, artificial, 360, 361.
Iodine for sheep, 366.

Lambs—see sheep.
Lespedeza, cattle grazing experiments with, 314.
Lignin, seasonal changes in grass, 59.
Livestock—
  in war-time Britain, 88.
  production in war program, 83.
  programs for postwar students, 376.

Manganese for swine, 14.
Measuring—
  amount of genetic change in a herd average, 358.
  performance of progeny of rams, 157.
Meat—
  protein and hemoglobin, 364.
  protein, carbohydrate and fat, 366.
  muscle-bone ratio as index of carcass merit, 42.
  muscular tissues for histological studies, 244.
  relation of carcass quality to live weight of hogs, 363.
  riboflavin content of beef and pork muscle, 363.
Memorial, 99
Minutes of the thirty-fifth annual business meeting, 91.
Molasses for lambs, 364.

National Live Stock and Meat Board research program, 364.
News and notes, 100, 170, 259, 378.
Nicotinic Acid—
  for growing pigs, 23.
  response of pigs, 139.

Ovulation in ewes, 251.

Pantothenic acid for swine, 365.
Pasture—
  as a feed for dairy cattle, 369.
  for hogs, 368.
  government programs, 368.
  typical plains, chemical composition, grazing value and vegetative changes, 237.
Peanut hay for dairy cows, 362.
Percherons—see horses.
Performance—
  in swine, 356, 365.
  progeny of rams, 157
  record of, tests for beef cattle, 321.
Phenothiazine—
  and salt mixture for sheep, 372.
  for worms in sheep, 372.
  salt lick and drench for sheep, 371.
Pig—see swine.
President, address, 80.
Professor, evolution of, 377.
Protein—
  biological methods of measuring the value of, 263.
  effects of with carbohydrate and fat, 366.
  for swine, 374, 376.
  meat, 364.
  vegetable vs. animal, 367.

Pyridoxine—
for swine, 365.
response of pigs to, 138.

Rams—see sheep.
Rental of bulls, 360.
Research—
program of National Live Stock and Meat Board, 364.
workers' responsibility in livestock production, 83.
Riboflavin—
in beef, 363.
in pork, 363.

Salmonella choleraesuis, pigs given large doses of, 138.
Semen—
character and production in young beef bulls, 360.
shipment of, 361.
Sheep—
alfalfa for breeding ewes, 209.
blackstrap molasses for, 364.
blood phosphorus of, 369.
cottonseed meal for, 27.
development of Navajo fiber, 370.
estrus and ovulation, 251.
fattening, 336, 369.
growth, 371.
influence of sire in birth weight of lambs, 152.
iodine-fluorine for, 366.
Karakul, ear measurements and fur value of, 146.
phenothiazine for, 371, 372.
pregnant mare serum for, 372.
progeny performance of rams, 157.
Rambouillet fleeces, 181, 188, 197, 358.
wool yield in four breeds, 370.
Silage—
corn meal in, 361.
sorgo, for dairy cows, 295.
Soybean meal—
for pigs, 374.
utilization by steers, 328.
Steers—see cattle.
Sulfaguanidine, response of pigs, 138.
Swine—
animal protein for, 374.
B-complex vitamins for pigs, 373.
birth weight of, 373.
breeding for rate of gain, 374.
carcass conformation and live weight values, 363, 373.
changes in carcasses, 357.
concentrate mixture for, 374.
effects of sex on development in pig, 358.
growth and carcass measurements, 375.
heredity and environment in growth, 3, 118.
heritability evaluated by scoring, 375.
inbred from crossbred, 129.
incoordination in, 365, 375.
manganese for, 14.
nicotinic acid for, 23, 138.
pantothenic acid for, 365.
pasture for, 368.
performance, 356, 365.
plant protein for, 376.
pyridoxine for, 138, 365.
quality of carcasses, 231.
salmonella choleraesuis for, 138.
sulfaguanidine for, 138.
thiamin for, 138.

Thiamin for pigs, 138.
Typhoid, basis of resistance, 357.

Urea, effects of feeding to steers, 166, 328.

Vitamin A in blood of calves, 362.

Weight—
birth, of lambs, 152.
of swine, 373.
Wheat for beef cattle, 360.
Whey for calves, 361.
Wool—
clean yields in body regions of four breeds, 370.
fiber in Navajo sheep, 370.
fineness in eight sampling areas, 197.
heritability of yearling fleece, 358.
Rambouillet fleeces, 181, 188, 197, 358.
sampling and measuring, 371.
staple length in relation to production, 33.

AUTHOR INDEX FOR VOLUME II

Almquist, J. O., 356.
Andrews, F. N., 209, 244, 356, 366.
Appleby, A., 251.
Atkeson, F. W., 295.
